DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Reinert, Sr. (6113245). Reinert shows in Fig. 4; a cylindrical outer ring with a flange and threaded interior surface "85" and a cylindrical middle ring having a flange at one end and a threaded exterior "62". Reinert further shows in Fig. 13 an inner cylindrical ring "205" with an annular groove on flange "206" with stop holes "209" which cooperate with fasteners "120" as shown in Fig. 11 with the middle ring bolt holes for removably supporting the cylindrical inner ring "205" in the middle ring by engagement with the stop holes "209" in the inner ring. Re claim 4, note both Figs. 11 and 13 of Reinert show a middle ring of sufficient diameter to allow the light fixture's components to pass through. Re claim 8, the bolts "120" in Fig. 11 of Reinert are considered set screws mounted in the middle ring and engaged in the stop holes of the inner ring groove.

Allowable Subject Matter

3. Claims 2, 3 and 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 9 and 10 are allowed.
